CHIMERA LAUNCHES PORTABLE LIGHTBANK KITS FOR POPULAR
CREAMSOURCE LIGHTS

The market asked and Chimera delivered: NEW Lightbanks for the Creamsource
SpaceX and the Micro.

The Octa 5 SpaceX Kit includes a heavy duty Speed Ring and an Octa 5 that has
been optimized for the SpaceX. This Octa can be easily expanded to a massive Octa
7 using the standard 7' expansion kit. Full Chimera Cloth screen and weighted baffle
included to help deliver broad, even illumination.

The [POP] bank for the Creamsource Micro attaches directly to the fixture without the
need for a Speed Ring or bracket. Handcrafted in Colorado using field tested,
proprietary textiles for a long service life. Front screen is sized 11x 16"/406x559mm,
or standard XS, which more than quadruples the front aperture. Includes an internal
baffle, full & half Chimera Cloth screens and is packed in a compact messenger
sack.
