

CHIMERA BOWENS SPEED RING OPTIONS

Chimera's Bowens mount Speed Rings have been around for decades! Originally designed for use with the Super Pro (Strobe) range of Lightbanks. If using Video Pro Lightbanks, Chimera recommends using 1/2" longer poles to provide for best textile tension in the Lightbank.

2490AL

Chimera's Aluminum Speed Rings are a durable solution for everyone. With full metal construction, Aluminum Speed Rings feature four pole blocks to support Rectangular and Strip Lightbanks.

2490OP

Chimera's OctaPlus Speed Rings combine durability with versatility. With eight pole blocks, OctaPlus Speed Rings support Chimera's OctaPlus and Octa Beauty Lightbanks, as well standard rectangular Lightbanks, Strip Lightbanks and Lanterns. Constructed from durable aluminum, OctaPlus Speed Rings are built to Chimera's legendary high standard of quality.

2490QR

The Chimera Quick Release Speed Ring simplifies set up and take down of Lightbanks and becomes as easy as flipping a lever. It also makes it very easy to move Lightbanks around without disassembling them.

24902001

You can repurpose many of your existing still size Speed Rings for use with Bowens mounts by purchasing the insert and replacing your existing insert.

NOTE: Fits most 2000 series Speed Rings use with Super Pro Lightbanks. WILL NOT FIT 9000 series Video Pro Speed Rings. Consult factory for details.

POLE REFERENCE TABLE

Video Pro Stock Poles

Best When Using Bowens Ring
