

# OCTA LIGHTBANKS

Chimera’s range of Octa Lightbanks create stunning light – that gorgeous quality of light desired by professional image makers. In sizes ranging from 24” (61 cm) to 7’ (2.1m), there’s an Octa Lightbank that will do the job for you.

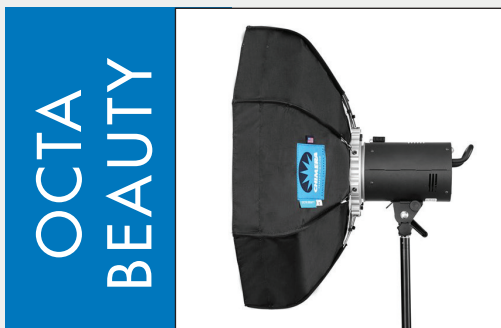

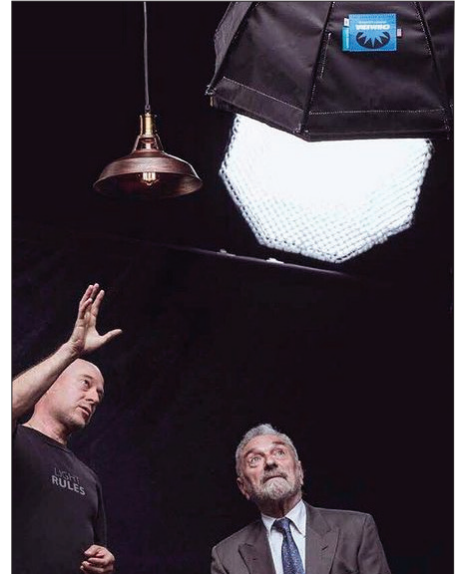

The Octa Beauty Dish creates stunning soft light for those commercial beauty headshots and portraits. A center bounce disc reflects the “raw” light from your light source into a soft white reflector.

The Octaplus range uses Chimera’s standard OP Speed Rings and works with strobes, hot lights and many space lights and is available in 3’ (0.9m), 4’ (1.2m) and 5’ (1.5m), expandable to 7’ (2.1m). Octaplus is supplied with a Chimera Cloth front screen and a weighted internal baffle to give superior even field.

Lighttools® Soft Eggcrates® Fabric Grids are available for all models.

**Key Features:**

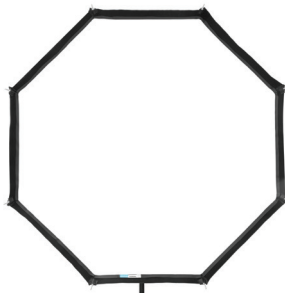

- Soft silver or white interior for efficient light output and diffusion
- Optimal size and shape for beautiful, wrapping light
- Inner baffles for Octaplus evenly disperse light output
- Handcrafted in Colorado, USA

The Octa Beauty Dish provides a unique mix of diffused light with a crisp edge. It is lightweight and conveniently folds up for easy transport.
